

CaNiAr Energy: Premium Peruvian Copper Solutions

The Red Metal Powering the Global Energy Transition

CaNiAr Energy (Caniar Ferraille SAC) offers high-grade Copper (Concentrates and Cathodes) from premier mining operations in Peru. As a strategic partner in the international mineral trade, we ensure a reliable supply chain of high-purity copper to meet the rigorous demands of the global industrial and technological sectors.

1. Technical Specifications (Standard Export Grade)

Our copper is recognized for its high conductivity and low level of impurities, adhering to international market standards.

Component	Specification (Typical)
Copper Content (Concentrates)	25% - 30% min.
Copper Purity (Cathodes - Grade A)	99.99% min.
Moisture	8.00% max. (Concentrates)
Impurity Profile	Low Arsenic and Antimony levels

2. Versatility and Requirements

We adapt our delivery to the specific metallurgical needs of our buyers. Our copper products are suitable for:

- **Refinement:** Clean concentrates ready for smelting processes.
- **Electrification:** Grade A cathodes for wire, cable, and renewable energy components.
- **Industrial Use:** High-quality raw material for alloys and specialized manufacturing.

3. Operational and Logistics Excellence

Leveraging the same robust logistics used in our anthracite operations:

- **Secured Storage:** Managed warehousing to preserve mineral integrity and prevent environmental contamination.
 - **Precision Loading:** Utilization of bulk-on-platform and containerized systems for efficient international shipping.
 - **Quality Control:** Rigorous sampling and analysis to guarantee that chemical characteristics meet buyer requirements.
