

Pager Carbon – Perú

1. ALMACENAMIENTO Y CARGUÍO

2. QUALITY OFFERED BY CANIAR FERRAILLE SAC to Foreign Clients:

Anthracite Coal: Chemical Characteristics We Offer:

Fixed carbon: 83.95 % mín.

Sulfur: 0.52% máx.

Ashes: 10.50% máx.

Humidity: 7.22% máx.

Volatile Matter: 5.85% máx.

Calorific Power: 7150.00 mín.

Granulometry: 00 a 30mm

NOTE: Bulk on platform

The particle size of the coal, in minimum or maximum millimeters, will depend on the buyer's actual requirements. Depending on these requirements, it could be in fragments < 15 mm, fragments between 15 and 30 mm, and fragments > 30 mm. This diameter can be obtained according to the graduation of the sieving screen. The larger fragments would pass through the crushing or grinding machine and then pass again through the sieving machine.
